ABOUT ME

Full-stack and mobile developer with experience building production-grade applications across Laravel, Kotlin, Java, and Flutter. Strong focus on Android development and API integration, with a background working remotely with cross-border teams (Indonesia-China). Known for fast learning, clean execution, and owning end-to-end features. Passionate about blockchain, investment technology, and scalable fintech systems. Currently pursuing a Bachelor's degree in Informatics while actively shipping real-world products.

EDUCATION

Tiga Serangkai University | June 2023 - June 2027 (Expected)

Bachelor of Informatics

WORK EXPERIENCE

Meval Indonesia | May 2022 - Present | Remote/Hybrid

Android Developer – Meval Indonesia

- Developing and maintaining Android applications using Kotlin and Java for inventory, invoice, and operational management products.
- Built multiple key features end-to-end including offline mode, background workers, and custom UI components.
- Collaborating with backend and product teams to improve performance and reduce app friction across diverse Android devices.

PT Industrial Multi Fan | 3-month contract | Remote

Android Developer

- Delivered Kotlin-based Android modules for internal operational tools.
- Improved UI consistency and optimized local data handling for stable use in low-spec devices.
- Worked closely with the engineering lead to align technical constraints with business requirements.

Confidential Startup | Remote

Remote Developer – Investment Web Tools (China collaboration)

- Built a custom web tool related to funding-rate style investment analytics.
- Worked directly with a China-based founder, handling front-end integration, API logic, and deployment.
- Gained experience working across culture/timezones and executing tasks with minimal supervision.

Ongoing | Remote

Freelance Developer – Remote

- Provided small-scale mobile and web solutions for clients, including converting apps into WebView builds.
- Consistently delivered clean and stable outputs on freelance projects.
- Seeking more complex freelance opportunities in full-stack or mobile development.

SKILLS

Languages & Frameworks:

Kotlin/Kotlin Compose, Java, Flutter (Dart), PHP (Laravel), JavaScript/TypeScript (basic), Filament (Laravel,) Smart Contract (Ethereum)

Backend Development:

Laravel MVC, authentication, payment/invoicing modules, RESTful API design, queue workers, Webhooks

Tools & Technologies:

Git, Firebase, Google Cloud Console, Cloudflare Workers, MySQL, Postman, Linux/Termux, Vercel

AI & Prompt Engineering:

- Designing structured prompts for financial insights, classification, and data extraction
- Integrating LLMs into mobile + backend workflows (OpenAI/GPT-mini, Gemini) using cloudflare worker / laravel
- Context-aware system prompts, error-handling, and multi-turn reasoning design
- Optimizing prompts for deterministic output (JSON, structured schema, Zod validation)

Interests:

Blockchain, fintech systems, crypto investment metrics, remote-first development
